Bishop laments rising number of 'celib' priests

Manila

and Marlene Guevara-Lopez

Manila

The Philippine Bishops' Conference has expressed its concern over the increasing number of priests who are choosing to remain celibate. The bishops said that this trend is a result of the lack of vocations and the desire to avoid the responsibilities of marriage and family life.

RP lady golfers get P13.7-M training

MANILA, Jan. 25 (AP) — The Philippine Ladies Golf Association (PLGA) has secured a P13.7-million training grant from the Philippine Sports Commission (PSC) to develop the country's women's golf team for the 2004 Summer Olympics in Athens, Greece.

The grant, which is the largest ever awarded to a women's sports organization, will be used to fund a series of training camps, seminars, and other activities aimed at improving the skills and performance of the national team.

PLGA president and PLGA National Team coach, Lito Tan, said the grant is a significant boost for the organization and its members. He added that the grant will enable the organization to provide the best possible training and support for the national team.

The PSC, which is the national governing body for sports in the Philippines, said the grant is part of its ongoing efforts to support the development of women's sports in the country.

Somalia has best chance for peace in years, says UN

MANILA, Philippines — A United Nations report says Somalia has the best chance for peace in years, but it also warns that the country is still far from stable.

The report, which is the first in a series of annual assessments, says that the situation in Somalia has improved since the end of the civil war in 1991. It notes that the country has made progress in rebuilding its infrastructure and that the government is beginning to take control of the country.

However, the report also warns that the country is still far from stable. It notes that there are still many armed groups in the country and that the government is still struggling to control the country. It also notes that the country is still facing a severe famine and that there are still many people who are in need of aid.

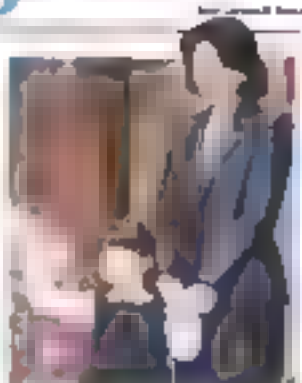

Illustration of a Somali woman and child, from the UN report on Somalia.

Depressed infant reflects a painful past

By the Inquirer

MANILA, Philippines — A photograph of a depressed infant, taken in a refugee camp in Somalia, is a powerful symbol of the pain and suffering that has befallen the country. The image shows a young child, looking directly at the camera with a sad expression. The child is sitting on the ground, and the background is a simple, makeshift shelter.

The photograph is part of a report by the United Nations on the situation in Somalia. The report says that the country is still facing a severe famine and that there are still many people who are in need of aid. It also notes that the country is still far from stable and that there are still many armed groups in the country.

UK advertisers pull out over racism complaints

MANILA, Philippines — A number of UK advertisers have pulled out of a television advertisement campaign in the United Kingdom, citing complaints of racism. The campaign was for a new television show, and the advertisers were concerned that the show might be seen as racist.

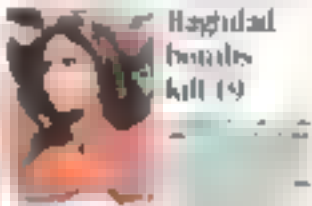

Illustration of a woman, likely a Filipino woman, as part of a news story.

Hagibid boards kill 19

MANILA, Philippines — A typhoon, known as Hagibid, has killed 19 people in the Philippines. The typhoon hit the country on November 11, 1999, and caused significant damage. The death toll is still rising, as more bodies are being recovered.

1. The first step is to identify the main topic of the document. This is typically found in the title or the first few paragraphs.

2. The second step is to identify the key points or arguments made by the author. These are often found in the body paragraphs.

3. The third step is to identify the evidence or data used to support the arguments. This can include statistics, quotes, or references to other works.

4. The fourth step is to identify the conclusion or final point made by the author. This is typically found in the final paragraph.

5. The fifth step is to identify any other important information, such as the author's name, the date of publication, or the source of the document.

Regression coefficients and statistics for the 1980-1981 season

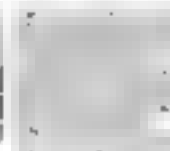

Do or die for Spinners, Pop Kings

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor discoloration and faint, illegible markings, possibly from a previous page or a watermark. The left edge of the page shows the binding of the book, with visible stitching or staples. The overall tone is warm and vintage.

RP on map of Asia's top investment sites

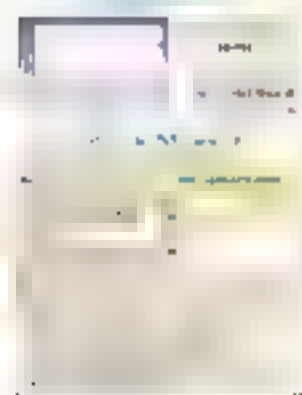

MANILA (AP) — The Philippines is on the map of Asia's top investment sites, according to a new survey by the Asian Development Bank (ADB). The survey, which is the first of its kind, ranked the Philippines as one of the most attractive investment destinations in the region, alongside China and India. The ADB, a multilateral development bank, said the Philippines' strong economic growth and improving business environment were key factors in its high ranking.

Dutch firm expects PlastiX to hit historic highs in '97

By Benito S. Reyes

MANILA (AP) — A Dutch firm expects PlastiX, a Philippine-based plastic packaging company, to hit historic highs in 1997. The firm, which is a subsidiary of a Dutch multinational, said it expects PlastiX's sales to reach a record high of P1.5 billion this year. PlastiX, which has been in operation since 1985, has experienced steady growth over the years, and its success is attributed to its strong relationships with its customers and its commitment to quality. The firm's management expects a bright future for PlastiX in the coming year, as it continues to expand its market share and improve its production efficiency.

Transco auction put off due to legal issues

By Michael J. Davis

MANILA (AP) — The Transco auction, which was scheduled for last week, has been postponed due to legal issues. The auction, which was organized by the Philippine National Bank (PNB), was intended to sell off the assets of the Transco, a company that had been in financial trouble. However, the PNB has decided to postpone the auction until the legal issues have been resolved. The legal issues involve a dispute between the PNB and the Transco's creditors, who claim that the PNB's actions are unfair and discriminatory. The PNB has denied these claims and insists that the auction is necessary to settle the Transco's debts. The auction is expected to be held in the near future, once the legal issues have been resolved.

You are what your mother ate, docs say

By Thomas H. Anderson

Can you tell me how many of the following are true for you?

Figure 1 is a 3D bar chart showing the percentage of total sample for each of the 100 species. The x-axis represents species number (1-100), the y-axis represents percentage (0-100), and the z-axis represents species name. The chart shows a distribution where a few species have high percentages (up to 100%) and many have low percentages (down to 0%).

But how can we measure

Figure 1 illustrates the experimental setup. A subject is seated at a table, looking at a video screen. A camera is positioned above the screen to capture the subject's view. A light source is positioned to the left of the screen to illuminate the scene. A scale bar is visible below the screen. The diagram is labeled with 'Subject', 'Video screen', 'Camera', 'Light source', and 'Scale bar'.

Figure 1 consists of two scatter plots. The top plot shows the relationship between the number of species (S) and the number of individuals (N) for 100 samples. The x-axis is labeled 'N' and ranges from 0 to 100. The y-axis is labeled 'S' and ranges from 0 to 10. A linear regression line is fitted to the data points. The bottom plot shows the same data points but with a non-linear regression line fitted to them. The axes and data points are identical to the top plot.

Demand full disclosure from realty agents before **buying a house**

By Tom E. Lopez

BUYERS OF REAL ESTATE should be aware of the risks involved in buying a house, especially when the transaction is handled by a real estate agent. A recent survey by the Philippine Real Estate Association (PREA) shows that only 10 percent of buyers are satisfied with the disclosure of information by agents.

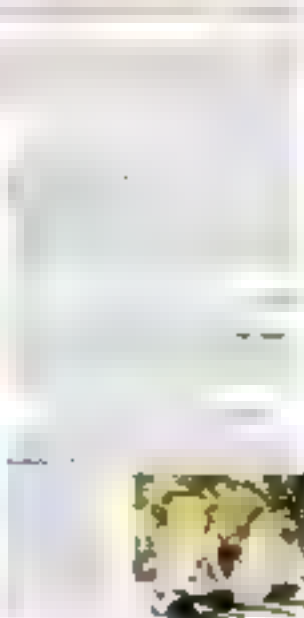

Most of the complaints are about the lack of information about the property's history, the seller's identity, and the agent's credentials.

PREA also found that 70 percent of buyers are not aware of the risks involved in buying a house.

The survey also found that 80 percent of buyers are not aware of the risks involved in buying a house.

Courtyard community to rise in Tagaytay City

For those who want to enjoy the scenic view of the city, a new community is set to rise in Tagaytay City. The project, known as the Courtyard Community, is a 10-story building that will offer a mix of residential and commercial spaces. The building is located in a prime area of the city, and its construction is expected to start soon. The project is being developed by a local real estate company, and it is expected to be completed within 18 months. The building will offer a mix of residential and commercial spaces, and it is expected to be a popular destination for both locals and tourists.

HomeSafe system detects pest unseen problems

HomeSafe, a new pest detection system, has been developed by a team of scientists. The system is designed to detect pest problems before they become visible to the human eye. It uses a combination of sensors and artificial intelligence to monitor the environment for signs of pest activity. The system is currently being tested in a number of homes, and it is expected to be available to the public within the next few months. The system is a significant improvement over traditional pest control methods, as it can detect problems before they become a major issue. It is a great addition to any home's security system.

It's the ultimate field trip for every young kid: too-a-boo to the South Sea Islands to Celine Dion.

A tale of two

By Staff Writer

It's a tale of two cities, one of which is the capital of the Philippines. The other is a small town in the heart of the country. The story is about the lives of two people who are connected by a common thread. One is a young man who has just graduated from college and is looking for a job. The other is an elderly woman who has been living in the same house for over 50 years. They both have a secret that they are keeping from the world.

The young man is named John. He is a bright and ambitious student who has always been a top performer in school. He is now looking for a job that will allow him to use his skills and make a difference in the world. He has heard that there is a great opportunity in the capital city, so he has decided to move there. He is excited and nervous at the same time. He has never lived in a big city before, and he is not sure if he will like it. He is also worried about the cost of living and the competition for jobs. He is looking for a place where he can grow and thrive.

The elderly woman is named Maria. She has been living in the same house for over 50 years. She has seen many changes in the world, but she has always stayed in the same place. She is a quiet and reserved woman who has always been content with her life. She has a small garden in front of her house where she grows vegetables and flowers. She spends her days reading and watching television. She has a few friends who visit her occasionally, but she is mostly alone. She has a secret that she has kept for a long time. It is a secret that she is not sure if she should tell anyone.

Maria's secret is that she is a spy. She has been working for the government for many years. She has been given a lot of information about the young man, John. She knows that he is a bright and ambitious student who is looking for a job in the capital city. She also knows that he has a secret of his own. She is not sure if she should tell him about her secret or if she should keep it to herself. She is torn between her duty to the government and her desire to help a young man who is looking for a better life.

Portrait of Maria

Batched admission

The Department of Education (DepEd) has announced that it will be implementing a new policy for the admission of students into the country's schools. The policy is called "Batched Admission" and it will be implemented starting next year. Under this policy, students will be admitted into schools in batches, rather than individually. This means that students who are in the same grade level will be admitted together. The policy is intended to help schools better manage their resources and to ensure that all students have a fair chance of being admitted. It will also help to reduce the number of students who are turned away from schools because they do not have the necessary documents or qualifications.

The policy will be implemented in all public schools across the country. It will also be implemented in private schools that are licensed by the Department of Education. The policy is expected to be a significant improvement over the current system, which has often been criticized for being unfair and inefficient. It will help to ensure that all students have a fair chance of being admitted to the schools of their choice. It will also help to reduce the number of students who are turned away from schools because they do not have the necessary documents or qualifications.

AMERICAN IDOL 9 IN MINNEAPOLIS

Out of 10,000 auditionees, only 17 pass muster

By Howard Rosenberg

MINNEAPOLIS — It was a long, long drive to the audition for American Idol 9, and the results were in. The show's 10,000 auditionees were whittled down to 17 who will compete for the title of America's next great singer. The show's producers, Simon Cowell, Randy Jackson, and Paula Abdul, announced the results on Tuesday night.
